ZHUO CHEN 37610109

How to test the program

1.gcc ZhuoChen.c -o zc

2.Run zc

3.To Test MYIP, type MYIP

4. To Test MYPORT, type MYPORT

5. To Test CONNECT, run two application in two difference servers, lets say one on
    timberlake, one of nickelback.
Type the following command on the one on timberlake
CONNECT 128.205.35.24 5001
128.205.35.24 is the IP for nickelback , 5001 is the default port number

6. To Test List, Type LIST after connecting to a peer

7.To test UPLOAD, first connect to a peer, let say the application is running on
timberlake want to upload to the first connected peer
use LIST to get the connection number of nickelback (connection number, not socket
number) then type UPLOAD 0 1.txt

8.To Test DOWNLOAD, connect to peers first, let say you are running on timberlake,
and want to download from the first connection peer , the file to download is 1.txt
use LIST to get the connection number
DOWNLOAD 0 1.txt
The COMMAND also support DOWNLOAD 0 1.txt 1 2.txt
OR DOWNLOAD 0 1.txt 1 2.txt 2 3.txt

9. To test TERMINATE, just TERMINATE CONNECTION NUMBER, let say you want to
    terminate 0 , just type TERMINATE 0

10, Type HELP, CREATOR to test other commands
